OUTGROWING YOUR CNC?

Your first CNC purchase is a leap of faith. You do research and discover the CNC you really want is a little out of your price range.

Your idea to use it as a secondary source of income is risky when you consider a more expensive CNC. You also want the reliability, support, and warranty of a proven CNC company. That is why we developed the SHARK SD100.

Next Wave CNC's SHARK SD100 will handle all your carving needs and is priced lower than kits offered by other manufacturers. The SHARK SD100 is fully assembled and features Vectric's VCarve Desktop Software.

TRADE IN TO UPGRADE!

Next Wave CNC's SHARK SD100 accepts all of our accessories. Like our larger CNCs, you can add accessories including the Pendant, solid state laser, mini 4th axis and others.

SHARK SD100'S best feature is when you're ready for a larger CNC, you can SHARK SWAP.

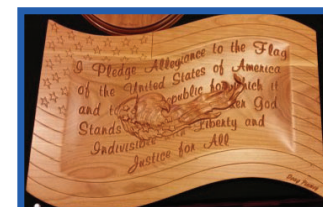

HOW IT WORKS

The SHARK SD100's original owner can purchase a CNC SHARK HD500, HD510 or HD520. Extended at any authorized distributor, then email sharkswap@nextwaveautomation.com for complete instructions on returning the SHARK SD100 for a \$500 refund.

THE BEST PART IS...

Next Wave CNC will completely refurbish your SHARK SD100 and through our partnership with The Mill National Training Center in Colorado Springs, Colorado, donate it in your name. Shark Swap allows Next Wave CNC to continue to support high school technical education and shop programs focused on training and technology.

IT'S JUST THAT EASY!
